Introduction

The purpose of this document is to provide developers with a guide on how to prepare a Model Sewer Adoption Agreement under Section 104 of the Water Industry Act 1991 and the Code for Adoption.

Under the Code for Adoption, you have a choice to either:

1. Request for the Engrossed Agreements to be prepared and issued by Yorkshire Water; or

If a developer wishes Yorkshire Water to prepare the Engrossed Agreements, you must complete and return a Request Form to Prepare Engrossed Agreement, alongside all required information to us. The form can be downloaded from our website: yorkshirewater.com/developers/sewerage/sewer-adoptions

2. Prepare the Engrossed Agreements yourself and return them to Yorkshire Water for signing

If a developer wishes to prepare the Engrossed Agreements themselves, and return all signed copies of it to Yorkshire Water for signing, a copy of the Model Sewer Adoption Agreement can be downloaded from our website: yorkshirewater.com/developers/sewerage/sewer-adoptions

A developer is unable to prepare a Model Sewer Adoption Agreement (MSAA) referred to in this guide if either of the following apply to the development site:

- if there is a Cash Bond on the site
- if there is a pumping station on the site

Yorkshire Water must prepare these Engrossed Agreements and issue them for signing as the details differ to the MSAA.

Prior to proceeding with either option, you must ensure you have **Technical Acceptance** in place for the site and be in receipt of the letter.

With either option, all parties subject to the MSAA must:

- have signed all copies of the documents
- ensure all copies of the MSAA contain the Technically Accepted drawings (A1 size) and these drawings are initialled by all parties to the MSAA
- ensure all relevant information required is contained within the MSAA; and
- all outstanding fees must have been paid.

Yorkshire Water will retain one copy of the signed MSAA for the site for our records.
