Dear

I refer to your request for information submitted to Yorkshire Water dated 5 June for information regarding:

"I'm currently reviewing DWMP catchment-level population equivalent (PE) growth across water companies and have been looking at Yorkshire Water's published DWMP material. While these are very useful, I haven't been able to find a complete structured dataset showing baseline and forecast population / PE at catchment or WwTW level.

Would you be able to share, or point me to, any of the following:

- baseline population equivalent / current population by catchment or WwTW*
- forecast population equivalent / future population (e.g. to 2050)*
- population growth percentages or supporting model outputs*
- any annual progress or supporting data table containing this information in spreadsheet form"*

Please find attached the data which you have requested

The information requested is published on our website under the 'View our annual progress report' tab, but we have also attached a copy of the reports to this email for response.

This includes:

- The current estimated domestic household residential population in 2025 for each Level 3 catchment. This information is provided to Yorkshire Water by an external organisation, Edge Analytics.
- The forecast estimated domestic household residential population in 2055 for each Level 3 catchment. This information is provided to Yorkshire Water by an external organisation, Edge Analytics

I trust that the provision of this data satisfies your request. In accordance with the Environmental Information Regulations 2004, if you are not satisfied with this reply to your request you can ask for an internal review. A request for an internal review must be submitted within 40 working days by contacting the Data Protection Team.

Thank you for contacting Yorkshire Water.

Yours sincerely,

Data Protection Team
