When was the last time you turned on a tap?
Was it to...
Did you think about where the water came from or how easy it was to get?
The fact is that we use water all the time without thinking about it.

A running tap can use up to 9 litres of water a minute.

A bath uses up to 80 litres of water and a shower 40 litres of water.

Each flush of the toilet uses six litres of water.

We use around 150 litres of water every day!
The fact is that we use water all the time without thinking about it.

Each flush of the toilet can use between six and thirteen litres of water.

We use around 150 litres of water every day!

A bath uses up to 80 litres of water and a shower uses 35 litres of water.

Each flush of the toilet uses six litres of water.
The fact is that we use water all the time without thinking about it. We use around 150 litres of water every day! Each flush of the toilet uses six litres of water.
The fact is that we use water all the time without thinking about it.
But imagine if you turned on a tap and nothing came out.
Now imagine you had to walk miles every morning to reach your nearest source of water...

in the heat.

How would you feel?
Then when you arrived you had to queue for a long time...

How would you feel?
And then your turn came to collect water and you discovered the water you had walked so far to collect...
Let’s travel to Ethiopia.
This is Azmera. She is 13-years-old and lives in Ethiopia.

She used to have to walk for hours to collect dirty water from her closest water source, before beginning the long walk back to her village with heavy containers.
I am Azmera Worku.
Thanks to the efforts of the charity WaterAid and the money raised by its supporters, Azmera’s village now has its own water supply.

This means that the children of the village can now go to school instead of spending hours every morning collecting water.
It means that the water Azmera and her friends are drinking is safe and no longer makes them unwell.
1 in 10 people worldwide do not have access to safe water to drink.

That would be the same as 3 members of each class.

Every day 1,400 children around the world die as a result of diseases caused by dirty water and a lack of toilets.
What can you do to make a difference?
How you can help!

By raising money for WaterAid we can help the charity buy important equipment to bring clean water to children like Azmera.

We need you to come up with some fundraising ideas.

Here’s what the money you raise could buy...
<table>
<thead>
<tr>
<th>Item</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>25mm pipe</td>
<td>£11.17</td>
</tr>
<tr>
<td>Soap holder</td>
<td>£6.96</td>
</tr>
<tr>
<td>Cement</td>
<td>£9.71</td>
</tr>
<tr>
<td>Kitchen sink</td>
<td>£35.36</td>
</tr>
<tr>
<td>Towel holder</td>
<td>£6.96</td>
</tr>
<tr>
<td>Brick</td>
<td>£0.09</td>
</tr>
</tbody>
</table>

These are the things we take for granted, but they can make so much difference to children just like you living in Ethiopia.
Thank you
