Dear

We refer to your request for information submitted to Yorkshire Water dated 35 June 2026:

“1.What recorded information constitutes the “significant assessment of impacts on our asset base” referred to in Yorkshire Water’s response?

5..Which organisational roles or business functions were responsible for reviewing, approving or endorsing Yorkshire Water’s assessments and advice relating to the Hebden Bridge Flood Alleviation Scheme? I am not requesting the names of individuals, but clarification of the governance and decision-making structure.”

Included with this email are the response to your questions:

Question 1:

Assessments have been undertaken and continue to be undertaken using detailed hydraulic modelling, site visits and geospatial assessment techniques. The recorded information of the significant assessment of impacts on Yorkshire Water's asset base includes modelling outputs, network performance analyses, flood risk assessments, sewer and water network capacity assessments, geospatial mapping data, scenario testing results and associated technical reports. These assessments consider the potential effects on water and wastewater infrastructure, and associated infrastructure. The information is used to identify areas of increased risk, areas of benefit and to understand potential impacts on service delivery and asset performance, and inform future investment, resilience planning and operational decision-making.

Question 5:

Colleagues from the Strategy and Regulation Directorate.

We trust that the provision of this data satisfies your request. In accordance with the Environmental Information Regulations 2004, if you are not satisfied with this reply to your request you can ask for an internal review. A request for an internal review must be submitted within 40 working days by contacting the Data Protection Team.

Thank you for contacting Yorkshire Water.

Yours sincerely,

Data Protection Team
