Dear

I refer to your request for information submitted to Yorkshire Water dated 17 February 2026 for the following:

"I would like to know the overflow setting and, where applicable, the storm tank capacity for all sewage overflows that are listed in the attached document. This should be a total of 66 in your region. I am aware this information is accessible in a permit, however to avoid seeking the permits for each overflow is it possible to produce a list in a CSV format.

- 1. Please provide the most up to date information. I am looking for the current overflow setting and current storm tank capacity, however, if there is additional information available about when the overflow setting was altered or storm tank capacity increased/decrease please include this in a 'note' column with a date that the amends were made."*

Please find attached the data which you have requested:

Please see attached spreadsheet with overflow setting and storm storage requirements from the relevant permits.

We note the additional request 'if there is additional information available about when the overflow setting was altered or storm tank capacity increased/decrease please include this in a 'note' column with a date that the amends were made.' We do not have this information readily available. The data protection team have conversed with the business and have established we do not hold any of the requested data. As such for the purposes of paragraph 12(4) a public authority may refuse to disclose information to the extent that (a) it does not hold that information when an applicant's request is received.

I trust that the provision of this data satisfies your request. In accordance with the Environmental Information Regulations 2004, if you are not satisfied with this reply to your request you can ask for an internal review. A request for an internal review must be submitted within 40 working days by contacting the Data Protection Team.

Thank you for contacting Yorkshire Water.

Yours sincerely,

Data Protection Team
