Dear

I refer to your request for information submitted to Yorkshire Water dated 19 March 2026 for the following information:

“telemetry data for Scorton SPS for 17/18 February, advised that there were tankers operating all night and would like to know if the SPS spilled into the beck”

Please find attached the data which you have requested. Although tankering was in operation, the level data indicates a potential spill. This is difficult to verify due to the impact of tankering on ultrasonic readings. The incident has been reported to the Environment Agency for investigation.

I trust that the provision of this data satisfies your request. In accordance with the Environmental Information Regulations 2004, if you are not satisfied with this reply to your request you can ask for an internal review. A request for an internal review must be submitted within 40 working days by contacting the Data Protection Team.

Thank you for contacting Yorkshire Water.

Yours sincerely,

Data Protection Team
