

Washburn Valley Fishery Prices & Opening Times

Fewston, Swinsty and Thruscross reservoirs offer exceptionally high quality fly and coarse fishing in a stunning rural setting. The fishery is easily accessible from the Yorkshire Dales, Harrogate, Otley and Leeds.

Each reservoir has at least one car park and toilet facilities are available at Swinsty Moor next to the fishing office.

Fewston is stocked with 1-4lb rainbow trout, with bag limits in place and is stocked regularly throughout the season. Swinsty is available for both fly fishing and coarse fishing.

Both reservoirs are part of the raw water supply system and the level of water can vary. This and the size of the waters will test the skill of the angler.

Thruscross reservoir further north, in a wilder remote setting, provides 140 acres of water as a superb wild brown trout (catch and return) fly fishery. Fishing is limited to designated areas.

Tickets are available to purchase with coins only from the machine in the fishing office located at Swinsty Moor car park, near the western end of Fewston dam wall. Please remember to register at the fishing office before fishing.
