

Yorkshire Water Local Practice – Water Asset Adoption Procedures

This document sets out Yorkshire Water’s local practice with regard to the water asset adoption procedures published in the Water Sector Guidance:

[water.org.uk/water-sector-guidance-approved-documents](https://www.water.org.uk/water-sector-guidance-approved-documents)

Plot reference numbers

The Water Sector Guidance procedures anticipate that plot reference numbers will typically be provided during Stage 7, but water companies are permitted to vary the timing of these references (as set out in section 4.6 of the Guidance).

It is Yorkshire Water’s local practice to provide a list of plot reference numbers for the site during Stage 3, alongside the Model Water Adoption Agreement, the quote for any required mains installation works and the design / design approval. This will include an estimate for payable infrastructure charges based on the information provided in the initial application.
