# Our Innovation Scorecard

## How we will share success

Ensuring innovation becomes part of ‘the way we do things’ at Yorkshire Water it is imperative to communicate successes, be able to benchmark our efforts and learn where things didn’t go to plan.

Our Innovation Score Card will be published quarterly, include our key areas of success, and how these innovations have helped improve performance or efficiency. Openly sharing our opportunities to learn within our organisation but also with our global community, role models our ambition to be transparent and embed collaborative problem solving into our DNA.
