Dear

I refer to your request for information submitted to Yorkshire Water dated 18 May regarding:

“Please provide me accurate coordinates of all monitored and unmonitored sewage discharge locations along the course of Holme Brook, Chesterfield, from Lower Linacre Reservoir to its confluence with the River Hipper. That is the egress points of all CSOs and other direct and indirect routes into Holme Brook from the sewage system for which you have responsibility.”

The data requested is readily available to the public in the public domain via the following link:

<https://www.yorkshirewater.com/environment/stormoverflows/event-duration-monitoring/>

If you go to the section 'individual start and stop events' you will be able to access the information held for the timeframe you require and you can filter the spreadsheets for the sites you have identified in your request by.

Our interactive storm overflow map provides real-time information on the operation of our storm overflows across Yorkshire. This is available via:

<https://www.yorkshirewater.com/environment/storm-overflows/live-map/>

You can search for a specific location or area within the map to view the nearest storm overflows and their current activity.

We trust that the provision of this data satisfies your request. In accordance with the Environmental Information Regulations 2004, if you are not satisfied with this reply to your request you can ask for an internal review. A request for an internal review must be submitted within 40 working days by contacting the Data Protection Team.

Thank you for contacting Yorkshire Water.

Yours sincerely,

Data Protection Team
