Reference Number: **EIR**

Dear

We refer to your request for information submitted to Yorkshire Water dated 23 September 2025 following our internal review of EIR:

"I currently only have data for faecal coliforms and/or Streptococci faecal for GRASSINGTON STW, ILKLEY STW and KETTLEWELL STW from the original data request

Please can you confirm if there is bacterial discharge data for the remaining sites."

Please find attached the data which you have requested.

We do not formally sample for bacteria unless it is a permitted requirement or there is an investigation on site.

We have some further records on investigation sampling, please be advised that if the sample point is on the INLET it is the bacti levels on in incoming flows not what the STW is doing, this is represented as 'I' in the purpose column.

We trust that the provision of this data satisfies your request. In accordance with the Environmental Information Regulations 2004, if you are not satisfied with this reply to your request you can ask for an internal review. A request for an internal review must be submitted within 40 working days by contacting the Data Protection Team.

Thank you for contacting Yorkshire Water.

Yours sincerely,

Data Protection Team
