Dear

I refer to your request for information submitted to Yorkshire Water dated 22 May for information regarding:

"I would be grateful if you could provide the following information for Blackburn Meadows Wastewater Treatment Works (S9 1HF):

- 1. Final effluent temperature data for the most recent available 12-month period, preferably hourly or daily. If this is not available, monthly average, minimum and maximum values would still be helpful.*
- 2. Final effluent flow data for the same period, preferably daily or monthly.*
- 3. Final effluent quality monitoring data for the same period, including pH, BOD, COD, suspended solids, ammonia, total phosphorus / orthophosphate, dissolved oxygen and any other routinely monitored parameters.*
- 4. The monitoring point location for the final effluent data.*
- 5. The sampling frequency and units used.*

6. Whether the final effluent temperature and flow data is measured before or after the new tertiary solids removal / phosphorus removal plant."

Please find attached the data which you have requested.

I trust that the provision of this data satisfies your request. In accordance with the Environmental Information Regulations 2004, if you are not satisfied with this reply to your request you can ask for an internal review. A request for an internal review must be submitted within 40 working days by contacting the Data Protection Team.

Thank you for contacting Yorkshire Water.

Yours sincerely,

Data Protection Team
